

Quality Improvement Plan (QIP)

Narrative for Health Care Organizations in Ontario

April 10, 2023

OVERVIEW

Queensway Long Term Care and Retirement Community, is a Southbridge Care Home with fifty-one (51) suites located in Hensall, ON. Our team is part of a larger organization whose overall plan is "One Team, One Mission, One Vision."

Southbridge Care's Mission: To provide quality care and services through innovation and excellence.

Southbridge Care's Vision: Bridging lives together with meaning and purpose.

Southbridge Care's Values: We utilize the acronym LIVE.

Live life to the fullest

Implement change through innovation

Value the freedom of choice

Exceed expectations

In following the Southbridge Vision of bridging lives together with meaning and purpose, our quality improvement plan for 2023 – 2024 reflects our commitment to improve current processes, and to test new care approaches that will improve residents' quality of life.

The following guiding principles are Southbridge's strategic theme:

- Operational Excellence: Processes and services are executed in a timely, accurate, value- based and cost-effective manner that exceeds stakeholder expectations.
- Risk Reduction: Priority oriented that necessitates continuous attention. Areas of risk are identified and mitigation plans are created and implemented in a timely manner.
- Customer Centered Exceeding customers' expectations in areas

of services provided. When making decisions, our customers' needs and requirements are a central consideration.

- **Safety Culture** Safety is embedded in processes to ensure we provide our customers and employees with a safe environment to live, work or visit.

The Strategic Plan ensures services to our residents will have increased person-centered programming and recreational activity to support the specific needs of our residents. Residents will have increased involvement in decision making and are actively involved on committees such as Resident Council. The Home ensures that employees and stakeholders understand that Queensway LTC and Retirement Community is the home of the residents and we have the pleasure of providing services in their home. We recognize operational excellence, risk reduction, and a customer-centered safe culture imbedded in our strategic themes, to achieve results. Our leadership team will effectively manage organizational change by recognizing that changes within the residents' environment must include the resident's prospective.

Performance monitoring is a key part of driving our performance and includes but is not limited to the following:

- Monitoring key quality indicators
- Internal audits
- External audits
- Program evaluations

Southbridge Care Homes measures and monitors quality initiatives using data accuracy and quality indicator score cards.

Queensway Long Term Care and Retirement Community is proud to have seen progress in the following areas:

Antipsychotics without diagnosis
Worsening wounds indicators

Continues a least restraint within the Home

Queensway Long Term Care and Retirement Community continually references best practices, implements Extendicare policy and procedure, consults with external resources through Extendicare and Southbridge Care Homes, and engages staff and family members in discussions about how we can continue to improve. Change management is in process. We are utilizing LEAN tools and techniques to achieve i) required business outcomes and, ii) improved resident care outcomes. It is the systematic management of engagement and adoption when the organization changes how work will be done.

Currently, we are developing action plans to address the necessary adjustments for our residents' needs:

- We will provide education, feedback to employees on the appropriate changes, and ensure employees are supported in the development of these plans.

Our target is to continuously improve and to reach the corporate benchmark for all indicators and have upper quartile provincial performance. As a result, our work plan for 2023/2024 will focus on the following indicators:

1. Antipsychotics
2. Emergency Department Visits
3. Percentage of Residents that agree they can express themselves without a fear of consequence

There are several challenges that could impact our ability to achieve our targets such as:

- The recruitment of qualified staff: RN, RPN and PSW's in our area often proves challenging. Due to the lack of licensed professionals in the community – common with the same need of all our colleagues within health care experience - at times we struggle to hire and retain staff;

- Turnover of multiple leadership positions and the outcome of leadership transition which leads to a lack of familiarity with current facility, staff, residents, routine and requires increased need for quality training.
- Ongoing costs/staffing needs associated with COVID-19 pandemic.

At the home level, resident and employee engagement and culture has improved. Throughout the pandemic, the Team at Queensway Long Term Care and Retirement Community has supported each other through isolation, ever-changing legislation, and staffing shortages. We have had amazing community support over the last 2 years. We are active members of our community which demonstrates co-operation and collaboration. Both our Resident and Family Council support has been ever present throughout the pandemic; these partnerships are valued and will continue to

REFLECTIONS SINCE YOUR LAST QIP SUBMISSION

In 2022, we had many QI achievements and successes to celebrate. These successes can be attributed to the hard work and dedication of our multidisciplinary team, the collaboration with our residents, families, and stakeholders as we all share the common goal of improving the care, service, experience and life for all that live, visit and work at Queensway Long Term Care and Retirement Community.

-Maintained low percentage of ED visits for ambulatory care-sensitive conditions

-Significant reduction in the use of antipsychotic medications without a diagnosis of psychosis from 21.95 to 18.42

-Maintained percentage of residents who responded positively to the statement "I can express my opinion without fear of consequences" at 100%

-Maintained high percentage of residents who responded positively to the statement "I would recommend this site or organization to others" at 94.1%

-Maintained low rates of infections and UTI's throughout the year
-Excellent and collaborative relations with Public Health and follow up with site visits relative to IPAC/COVID-19 Inspections - meeting all compliance regulations

We will continue efforts to maintain these achievements and work together with our multidisciplinary team, residents, families, and other stakeholders to achieve quality improvement targets in 2023-2024

PATIENT/CLIENT/RESIDENT ENGAGEMENT AND PARTNERING

We know we are stronger when we work in partnership with those we care for, along with their families and our team members.

Partnering with residents and families improves quality: it enhances safety, informs people-centered care reflecting each residents' individual needs, improves coordination of care, supports equity, leads to better health outcomes, informs effective and appropriate care decisions, and improves our own operational efficiency.

With this in mind, we put considerable effort into regularly and actively engaging residents and families for their insights and feedback, provide channels for open dialogue, and share ongoing progress through regular updates, collaborative face-to-face meetings, town hall sessions and experience surveys. Our ongoing goal is to continue to build on our existing approaches to resident and family engagement and continue to evolve our approaches to resident and family Partnership.

Queensway Long Term Care and Retirement Community is working closely with our system partners to improve quality of care and safety for our residents.

- We are partners with physiotherapy whose goal is to provide individualized, one on one physiotherapy service. Their vision has always been to deliver physiotherapy services that are individualized, client focused, and evidenced based.
- Queensway Long Term Care and Retirement Community uses integrated service through the HCCSS, Health Ontario, and London Rehab to work with occupational therapy for the ambulatory and locomotion needs of residents and assessments/services completed to ensure resident safety and comfort while ambulating
- We work closely with the HCCSS and Health Ontario both in the community and in hospital. This allows for residents to move back and forth with as little as disruption in care as possible.
- Residents with specialized foot care needs are followed closely by a qualified registered nurse.
- Queensway Long Term Care and Retirement Community

collaborates with ARC, ACT, Seniors Mental Health which will come to the home to provide assessments and guidance in the treatment of residents suffering mental health issues.

- We work closely with Behavioral Supports Ontario in developing and implementing strategies for managing responsive behaviors in the home both on an individual and strategic level.
- Queensway Long Term Care and Retirement Community provide eye and dental care for residents within the home.
- Queensway Long Term Care and Retirement Community also have a Pain and symptom management team in the home.
- Queensway Long Term Care and Retirement Community has student RN's, RPN's and PSW's coming into the home to complete the clinical portion of their education.
- We have been very restricted in the last 2 years of Covid pandemic in community involvement in the home. We have a long history of volunteerism and participation in the home which we have had to suspend but begin to open our community back up in a safe manner to our volunteers.
- Accreditation Canada is an independent process of assessing health care and social services organizations against standards of excellence to identify what is being done well and what needs to be improved.

PROVIDER EXPERIENCE

We are now into our next survey cycle, following Accreditation Canada's new Qmentum Long-Term Care Program which involves survey activities on an annual basis rather than once every four years. For 2023, all homes will complete self-assessments and develop updates to their quality improvement action plans. Homes, supported by our central quality team, will implement their quality improvement action plans through the balance of 2023 and into

2024.

Pressure in the health system affects the people working in health care which creates an increase stress in the mental health and well-being of the worker. Measuring the experience of healthcare providers can help uncover important health system improvement opportunities. As the acute impacts of the pandemic continue to wane, our teams across Southbridge continue to demonstrate their resiliency and ability to adapt frontline care delivery, with compassion, and dedication on a daily basis. In response to the additional challenging demands as a result of the pandemic on our team members and their families, we expanded our employee services to meet their needs.

During the pandemic, we offered flexible monetary compensation off for any team member who was required to quarantine or self-isolate following COVID exposure. Home-level educational and counseling sessions have been offered to further support our team members in managing mental health through the pandemic. Our Employee and Family Assistance program is available to support our team members. This program provides team members with confidential and flexible supports, whether related to emotional well-being, managing relationships and family situations, dealing with workplace challenges, financial guidance, or other personal needs.

Ensuring our team members are well-equipped with the tools they need is a key pillar of our Improving Care plan. This includes training and development to build the leadership and technical skills needed to best serve residents. Recent topics highlighted include crucial conversations, compassion fatigue, cultural safety training, Five dysfunctions of a team, servant leadership, and strength based training. In addition to receiving training on specific leadership expectations and learning about key corporate initiatives,

participants are able to connect with colleagues and build skills and knowledge as change leaders.

WORKPLACE VIOLENCE PREVENTION

Protecting the physical and mental health and safety of our team members remains a priority and is carefully considered by our Health and Safety team, who provides direct supports to team members. In 2023, workplace violence prevention policy and incident management education will undergo program enhancements for launch in 2024. It is the policy of the organization that each individual has the right to work in a professional atmosphere, in a harassment, discrimination and violence-free workplace.

Queensway Long Term Care and Retirement Community promotes the awareness of and proactive approach to dealing with violence and harassment in the workplace, and therefore will take reasonable steps to identify potential sources of violence and harassment, and to eliminate or minimize these risks through the Workplace Violence Prevention Program and application of associated policies.

Southbridge Care homes' safety talks also include the prevention of violence and harassment in the workplace and are a standing agenda item during our monthly meetings. Workplace Violence and Harassment Assessment is completed on an annual basis which determines the probability of injury and frequency of exposure to risk and used to create an action plan that will mitigate any risk identified.

PATIENT SAFETY

Over the past year at Southbridge Care Homes, we have introduced a number of strengthened quality and safety initiatives including

comprehensive safety culture education for all team members. Our Medication Safety Technology (MST) Project is focused on improving medication safety through several streams of work, including by directly targeting one of our core quality indicators, decreased antipsychotic prescribing. Each home completed Medication Safety Self-Assessment to identify risk levels. Southbridge Care Homes has increased Infection Prevention and Control (IPAC) capacity across all homes. IPAC Leads are designated in every home, providing daily oversight over proper IPAC practices throughout the home. IPAC Leads are supported by a central team of specialist IPAC consultants, who provide education, coaching and best practice implementation support. In addition, our regional IPAC specialists have advanced designations and certificates in various targeted aspects of IPAC practice, including facilities and redevelopment expertise, enabling them to support our communities in embedding prevention measures in various projects. Comprehensive IPAC reviews of each home are done annually, with frequent audits, to ensure the sector-wide learning's from the pandemic remain entrenched in all home operations. Our Pandemic Plan reflects the evolution of infection prevention in long-term care resulting from COVID-19's onset and is part of a more fulsome Emergency Preparedness program. All key pandemic work streams, such as staffing levels and PPE oversight, continue to be monitored which remains in effect to manage all outbreaks. Our vaccination programs – for COVID boosters and influenza – are ongoing and enabled by data analysis and weekly reporting to senior leaders. Daily case and outbreak reporting for all infections – COVID and non-COVID, across all homes – enables immediate central response to support homes. To strengthen our emergency preparedness program, we have provided enhanced planning and preparedness training for homes,

to ensure our teams are best equipped for swift and comprehensive responses to any and all emergencies if and when they do occur. Interactive preparedness training, frequent drills, scenario-playing, and introduction of tools that are easy to use in an emergency, are all part of our efforts in ensuring the safety of all of our residents and team members.

HEALTH EQUITY

Southbridge Care Homes uses a health equity and diversity equity and inclusion lens when developing programs and services. Our programming honors the cultures and identities of our residents. Our homes with Francophone residents, offer group programs in French and English,. First Nations programming is provided in Southbridge Care homes where any First Nations people reside. Through such programs, First Nations residents and other participants join in group art and music activities, and smudging and spiritual ceremonies, facilitated by First Nations community members. Pride celebrations are enjoyed throughout Southbridge Care homes, during Pride month and beyond. Group activities such as 2SLGBTQ (same acronym used by Ontario health) movie night and Rainbow Day are featured in our programming, alongside education and celebrating the lives of our 2SLGBTQ residents. Many homes host an annual Carousel of the Nations, featuring booths and information hosted by residents, their loved ones, and our team members, where everyone in the home can sample food and learn more about one another's cultures. Several homes host large celebratory events! During Black History month, homes have hosted everything from cultural fashion shows to artifact displays, to acknowledgement presentations for residents of colour who have served their communities. Diet offerings are tailored as much

as possible to the requests of residents. Food choices that help a resident feel truly at home are an important part of honoring resident culture and dignity.

A proud part of our cultural diversity is related to our spiritual supports offered. We invite all denominations to our homes and ensure each resident has their specific needs met. Newly developed homes include a reflections space and a prayer mat for resident use.
